Professional Summary

Computer Engineering graduate and **AWS Certified Solutions Architect Associate** with hands-on experience building cloud-native applications, microservices, and Android applications. Passionate about back-end engineering, distributed systems, and solving real-world problems through scalable software solutions.

Certifications

AWS Certified Solutions Architect - Associate (SAA-C03)

Amazon Web Services (AWS)

April 2026

- Validated expertise in designing highly available, cost-efficient, fault-tolerant, and scalable distributed systems on AWS.
- Demonstrated knowledge of compute, networking, storage, and database AWS services.

Skills

Languages: Python, Kotlin, Java, C/C++, SQL, JavaScript, HTML/CSS

Cloud & Architecture: AWS (EC2, S3, RDS, Lambda, IAM), Docker, Git

Frameworks & Tools: React, Next.js, Spring Boot

Databases: PostgreSQL, MongoDB, MySQL

Testing: JUnit, Mockito

Experience

Aug 2020 – Oct 2022: Python Developer (Freelancer)

Fiverr

- Developed and maintained Python automation/parsing scripts.
- Delivered 32 individual software solutions to international clients from 11 different countries.
- Maintained a perfect 5.0 star feedback rating.

Projects

JobAcer | Interview Simulation Web App

- Designed and implemented a cloud-native interview simulation platform using Spring Boot microservices and Docker.
- Implemented JWT-based authentication and RBAC authorization.
- Developed automated unit and integration tests using JUnit and Mockito.
- Deployed the app infrastructure on AWS.

Events | Microservices Web App

- Developed a distributed event management platform using Spring Boot and FastAPI microservices.
- Implemented gRPC communication for low-latency service-to-service interactions.
- Containerized services with Docker and integrated MariaDB and MongoDB persistence layers.

ElectriCost | Android App (Published on Google Play)

- Developed and published a Kotlin mobile application to help users calculate and manage electricity costs efficiently.
- Implemented local database management using Room and handled asynchronous tasks with coroutines.

Education

Sept 2022 – June 2026: B.Sc. in Computer Science and Engineering

Technical University of Iasi (TUIASI), Romania

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management, Software Engineering, Low-Level Programming.
